Chapter: IMBALANCE

What Is IMBALANCE ?

-Imbalance Can Also Be Called Price Efficiency Some People Call It Fair Value Gap (FVG)

-***IMBALANCE*** It Occurs When The Market Creates A Gap Within Three Candlesticks, So Which Means There Will Be A Gap Within One Of Those Candlesticks (That Gap Will Be Created In The Body Of That Candlestick).

How Do You See An IMBALANCE ?

•If You're On A Bullish Trend Market Will Give You A Serious Rise Or You Can Call It An Impulsive Rise.
•If You're On A Bearish Trend Market Will Give You A Serious Drop Or You Can Call It An Impulsive Drop.

-So Exactly What Happens Is That Market Fails To Leave A Point Of Interest (POI) , To Give Buyers Or Sellers Opportunities To Execute.

-And Most Of The Times We Need To Have A POI Before That Impulsive Movement. When *IMBALANCE Eventuate* That Movement Occurs Out Of The Blue Leaving Everyone Behind.

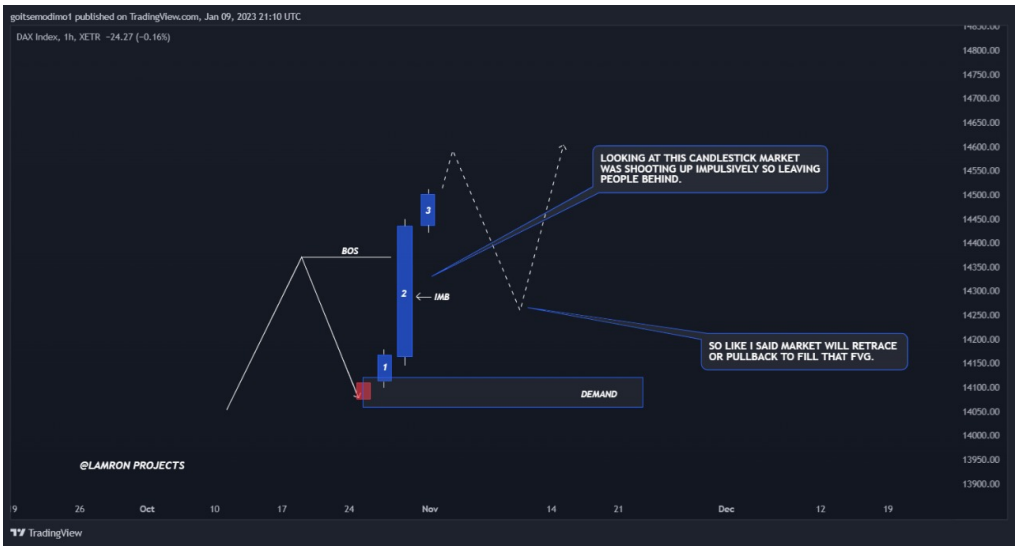

-During That Event , That Movement We Call It *IMBALANCE* Because Market Is Create Imbalance As A Whole.

What You Should Expect After An IMBALANCE ?

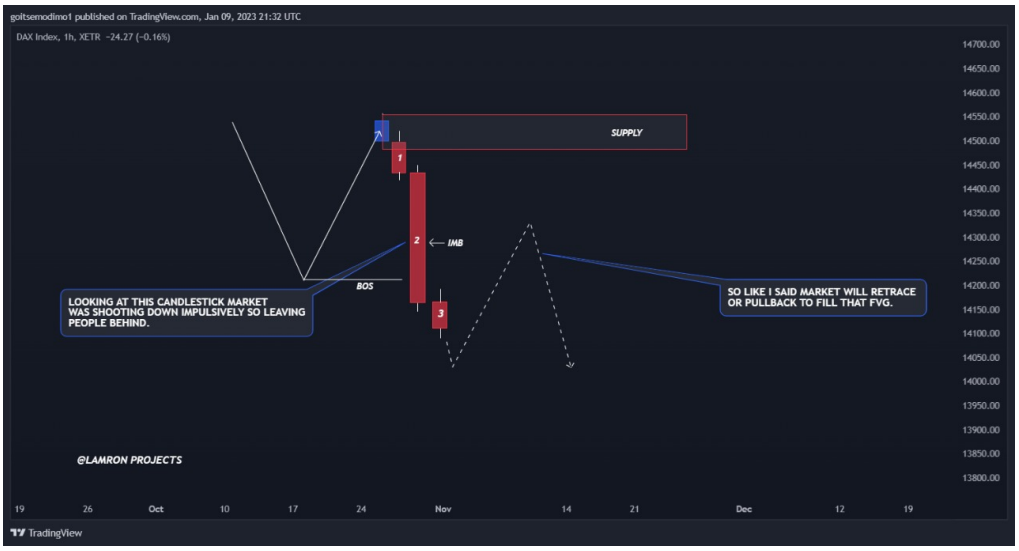

•What Market Basically Do Is That , Price It Will Often Comeback To Fill In That *IMBALANCE* (FVG) And Continue With The Overall Direction Of The Market.

FOREXAMPLES:

IMBALANCE On A Bullish Trend.

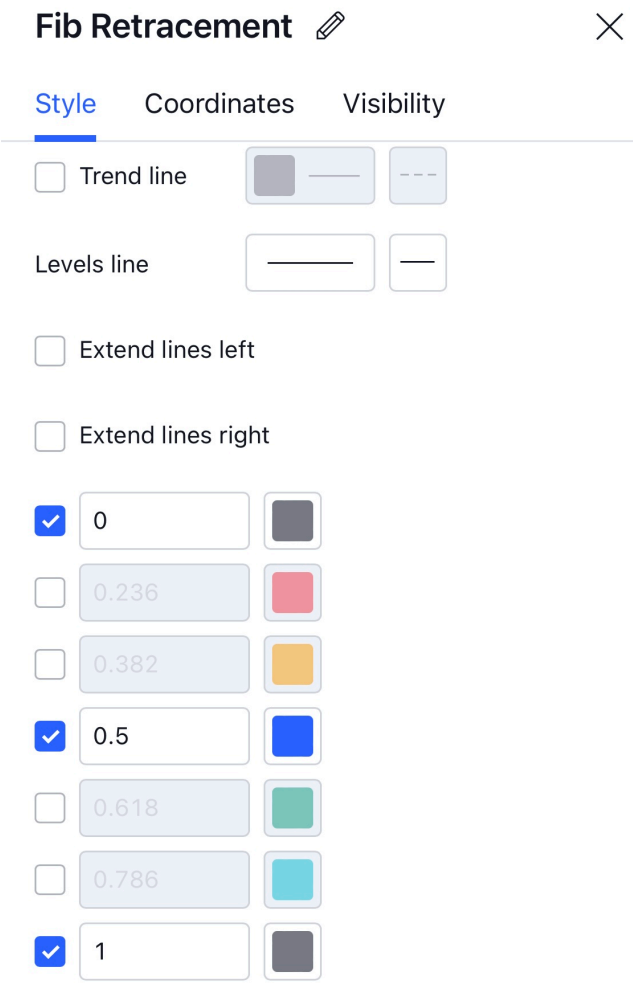

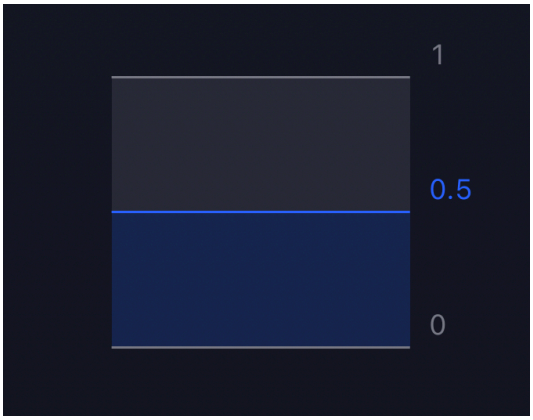

IMBALANCE On A Bearish Trend.

How To Catch An Entry During An Imbalance.

•So For You To Catch An Entry When You Got An Imbalance , You'll Have To Use 50% Entry .
•You Can Use Two Different Tools For Entry Which Are Gannbox And Fibonacci Retracement But I Prefer Using Fibo.
•The Following Screenshot Shows How To Set Your Fibonacci For 50% Entry .

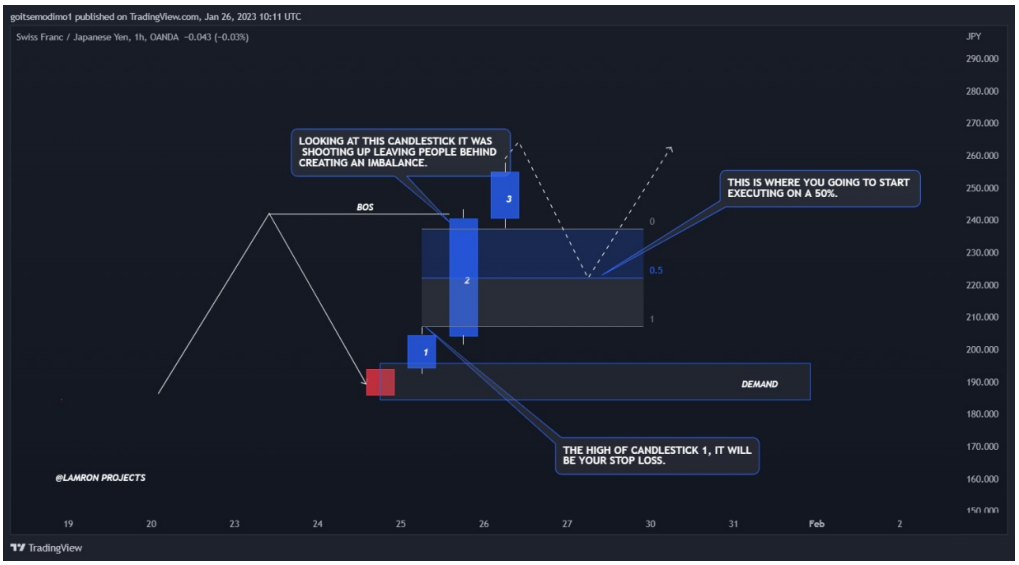

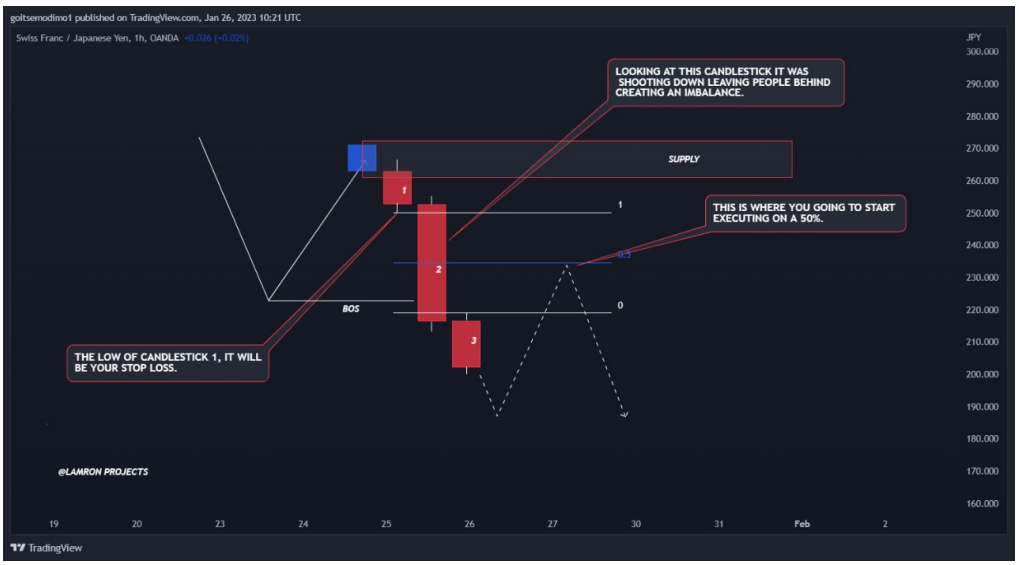

•So That's How Your Coordinates/Style Should Be Like For Your 50% Entry .

How To Implement Fibo On An Imbalance.

>On A Bullish Trend.

>On A Bearish Trend.

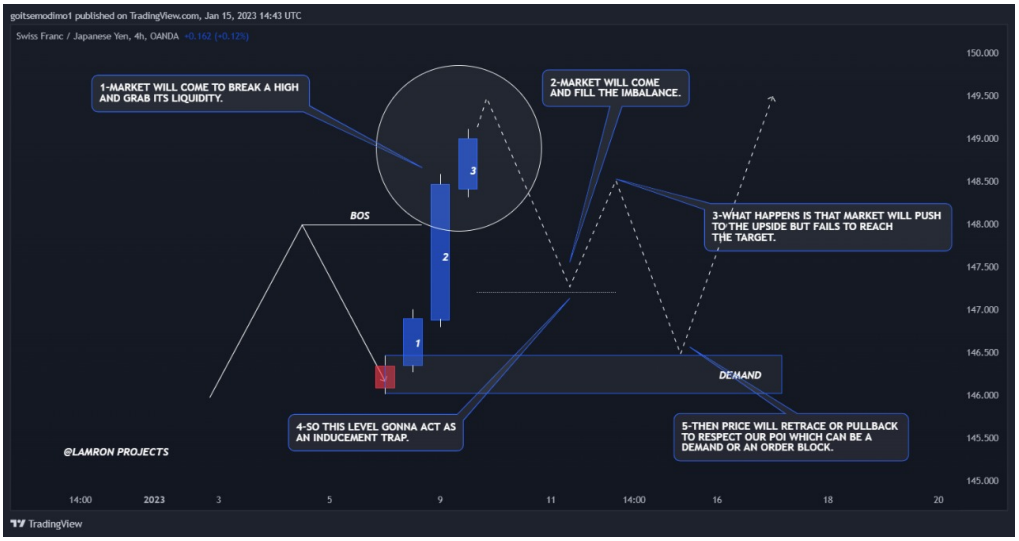

WHAT CAN ALSO HAPPEN DURING AN IMBALANCE.

•If You Can Look At The Setups Below , You Will Be Able To See That Sometimes What Happens Is That Market , Market Will Turn To Respect Your Imbalance But Price Will Fail To Break Your High Or Low Depending On A Trend You're Introduced To.

•When Market Creates Something Like That You Should Remember That You Have An Orderblock.

•You Should Be Aware That Sometimes Market Will Create Something Like That Where Price Will Bounce From Your 50% Zone Of Your Imbalance And Fails To Reach The Target Or Hit Take Profit Instead Price Will Pullback To Respect Your Orderblock.

EXAMPLE ON A BULLISH TREND.

EXAMPLE ON A BEARISH TREND.

SO WHAT DOES IMBALANCE DO?

•*It Strengthens Your* **POI (***Point Of Interest.***)**
