IMBALANCES (IMB)

WHAT CAUSES THESE MOVES?

1. CATALYSTS?

News, Economic Calendar Data, Product Launches, Earning Reports, Global News, FED talks, Innovations, Rumour, Partnerships, Deals & Contracts, etc...

2. RETAIL TRADERS?

Retail traders are not organized enough or have enough financial power for such a pump (unless special time-arranged pump/dump social media groups)

3. MARKET MAKER / SMART MONEY?

Market Maker / HFT (High-Frequency Trading / Algorithmic Bots) has the power of high financial capabilities to cause such a move, especially in low time frames.

IMBALANCES (IMB)

IMBALANCE in ORDER BOOK

UNHEALTHY PRICE ACTION
Healthy price moves require a balance between buy/sell orders. Otherwise, imbalances will occur.

The cause of these imbalances is either a CATALYST or MARKET MAKER!

ORDER BOOK		
BID / BUY	PRICE	ASK / SELL
	$104	8
	$103	5
	$102	2
	$101	4
	$100	
40	$99	
58	$98	
69	$97	
76	$95

Charts by TradingView

COFFEE EXAMPLE

$40

3. IMBALANCED PRICE

One day coffee price jumps from $5 to $40. Nobody will buy until the price is BALANCED again

4. BALANCING PRICE

Price steadily drops where the IMBALANCE started. Otherwise, no one will buy coffee again.

$5

2. BALANCED PRICE

Coffee prices steadily rise (Healthy Price Action) due to inflation and global economic conditions. Mini imbalances corrected

$3

1. BALANCED PRICE

Coffee price starts at $3, a regular world-standard price. Price in BALANCE

Any trade that is taken based upon our educational or research materials is at your own risk for your own account. Trading foreign exchanges (forex), cryptos (cryptocurrencies or coins), stocks, options, commodities, ETFs, mutual funds, index funds, or any other type of financial securities on cash accounts or margin accounts **may not be suitable for all investors and could be highly risky.**

Trading results vary and can never be guaranteed. Every type of trading carries a high level of risk. There is a great possibility that you can sustain losses from your investments. Thus, you should not invest money that you cannot afford to lose. You should do your own research and risk management before entering a trade or consult with a professional financial advisor. Past performance is no guarantee of future results.

Before buying or selling foreign exchanges (forex), cryptos (cryptocurrencies or coins), stocks, options, commodities, ETFs, mutual funds, index funds, or any other type of financial securities, **you should carefully consider your education about the investing / trading, risk management and risk appetite, investment expectations and experience levels.**

Leverage enables traders, using a relatively small amount of money, to take a position that is many times the initial investment. This leverage effect can work both in your favour and to your detriment. It also opens up the risk of experiencing high losses. Please trade with caution when you use leverage in trading or investing. Your risk is particularly not limited to the initial investment, but can quickly fall into a negative range in the event of strong movements, meaning you may be obligated to pay far more than your initial wager.

Furthermore, we would like to draw attention to the “leverage” effect of trading, which can work both for you and against you. Exploiting such leverage effects can lead to large losses in trading on the one hand and to high profits on the other.

Mete Kaplan cannot be held responsible for possible losses or other damage. Consequently, no claims for damages can be asserted. Please also note that trading has a certain addictive potential. If you find yourself at risk, please seek professional help.
